Did You Know?

You should put your car keys beside your bed at night. If you hear a noise outside your home or someone trying to get inside your house, just press the panic button for your car. The alarm will be set off, and the horn will continue to sound until either you turn it off or the car battery dies.

Carry your keys while walking to your car this could save a life of an elderly person who fell or prevent an assault crime.

Comments

Just be aware of your surrounding of anything suspicious and do report it. Sadly to say we have lost quite a few police officers so be patience as the time frame for response might be slower.

I expect that there will be an increase in firework activity for the 4th of July weekend which I hope everyone will enjoy, but at the same time respect your neighbors. I heard that effective July 1st; no police officer will be dispatch just for the fireworks unless someone is hurt. Fireworks might eventually become legal???? Have a Happy Safe 4th!

Block Captains Corner

I want to introduce you to our block captains that have volunteered to keep a watchful eye out for any suspicious activities on your street. I would recommend that you contact and introduce yourself so in case of any emergency, your block captain can respond appropriately.
